BIM-EDIT 5.6B Release

BIM-EDIT release 5.6B is now available. Please contact Tech Support for the current fix information. The Product Key for product expiration must be obtained from CSI's Website (<http://www.e-vse.com>). The enhancements are summarized below. Enhancements and fixes are discussed in more detail in the online help provided with BIM-EDIT. Enter the command:

HELP EDIT-56B

to get more information.

Major Changes

- BIM-EDIT 5.6B is primarily a maintenance release.

New Commands

- New LISTCAT command.
Use LISTCAT to create a LIST session of a VSAM cluster, or a directory listing of selected VSAM clusters from a specified catalog.
- New mixed case title option.
An MMP variable has been added to allow for mixed case title for library, member or user definitions.
- Enhanced SHOW command.
SHOW command displays operating system release level.

Misc. Changes

- Problem fixes.
The remainder of the changes to BIM-EDIT 5.6B is code changes for known problems in BIM-EDIT 5.6A.
