CSI's software solutions are available worldwide through its international distribution network,
and directly in North America from CSI and select Business Partners.

"Delivering what the competition can only promise."

CSI INTERNATIONAL

Dr. Crypto

Dr. Crypto enables Dr. D to encrypt saved (backup) files.

- Currently supports DES, Triple-DES, and AES encryption (AES encryption requires the hardware encryption facilities)
- Provides a secured handshaking interface between BIM-EPIC and Dr. D as an optional security trigger. When Dr. Crypto uses the BIM-EPIC interface, BIM-EPIC creates a unique encryption key for every version—Dr. D picks up all information from BIM-EPIC and encrypts data as it is written
- Supports creation of both encrypted files and non-encrypted files in a single execution
- Encrypts saved files created on either tape or disk
- System requirements: Dr. D 6.8, and SSL for VSE 1.5E
- Optional: BIM-EPIC 7.1
